3 Doorbell Installation

Install Micro SD Card

1. Open the faceplate from the bottom.

2. Open the Micro SD card slot cover.

3. Insert the Micro SD card.
Install the Doorbell

1. Install the mounting level, and mark points on the wall for drilling according to the mounting level.

2. Drill holes on the wall, insert expansion bolts, and then insert 0.75” self-tapping screws.
3. Connect the power wires coming out of the wall to the terminals on the back of the doorbell with set screws. (DC 12V or AC 16~24V)

4. Open the faceplate from the bottom.
5. Secure the doorbell body to the bracket using the corresponding set screws.

6. Attach the faceplate to the body from the top.
7. Tighten the anti-theft screws at the bottom of the device using the screwdriver.
Install the Bracket (Three ways)

A. Install the angle adjustment bracket with 0.75” self-tapping screws.

B. Install the angle adjustment bracket with 0.75” self-tapping screws.
C. Stack angle adjustment brackets

(1) Stack the vertical angle adjustment bracket on top of the horizontal angle adjustment bracket, then install the brackets onto the wall.

(2) Use the supplied 1.26” self-tapping screws when stacking brackets.
4 Set Up

Download EZLive

Make sure your mobile phone has been connected to Wi-Fi. Scan the following QR code to download and install EZLive.

Add Devices

1. Open EZLive, sign up an overseas account and log in.
2. Click + in the upper right corner, and select “Add Wi-Fi Device”.

3. Choose video doorbell device.
4. Follow the instructions to prepare the device ready for configuration.

[Diagram of preparing device for Wi-Fi network]

[Diagram of resetting device]

- Make sure the device is covered by Wi-Fi network
- Press and hold the reset button for 10s, and release when the red light or IR light starts flashing slowly (1/s). Wait patiently. The red light or IR light will turn off and then turn on again as the device resets and restarts.
5. Complete configuration information and Scan the QR code on the doorbell.
6. A QR code will be Generated on the APP.

7. Use the camera of the doorbell to scan the QR code. When the doorbell indicator turns into steady green and you hear “Network Connected”, click Success. Continue.
8. Set DST after the device is added.
9. View the doorbell in the device list.

6 Notes

1. Make sure the connected Wi-Fi is 2.4GHz.
2. Make sure your router is close to the doorbell.
3. The installation height of the doorbell is about 1.6 meters.
4. Do not install the doorbell on the metal door to avoid signal interference.
Regulatory Compliance

FCC Part 15
Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) This device must accept any interference received, including interference that may cause undesired operation.

If the distance from the product to the human body is greater than 20cm, the following warning is required (this requirement is not required for micro-power SRD devices).
This equipment complies with FCC/IC RSS-102 radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
LVD/EMC Directive

This product complies with the European Low Voltage Directive 2014/35/EU and EMC Directive 2014/30/EU.

WEEE Directive–2012/19/EU

The product this manual refers to is covered by the Waste Electrical & Electronic Equipment (WEEE) Directive and must be disposed of in a responsible manner.
Battery in the product complies with the European Battery Directive 2013/56/EC. For proper recycling, return the battery to your supplier or to a designated collection point.

*Product specifications and availability are subject to change without notice.
